Program outline

The course will be delivered using different modes of delivery involving classroom-based instruction and practical skills development sessions. Training will be coordinated from MIWT'S head office and delivered in a simulated work environment.

Candidates will participate in facilitated learning sessions using PowerPoint presentations, handouts and discussion. During practical sessions, candidates will be asked to work in pairs and facilitated through a range of practical skills using various height safety equipment. Participants will learn skills through practical instruction using demonstrated performance methods such as: Demonstration, explanation.

Expected duration

The program is delivered over 16 hours and is comprised of theory and practical sessions. The program culminates with a practical assessment activity and theory assessment.

Assessment requirements

Candidates must successfully complete all assessment activities in order to be assessed as competent.

The assessment for Forklift course is to be conducted using a combination of written theoretical assessment and practical assessment during simulated workbased scenarios. The following assessment methods are to be applied to collect the required assessment evidence in accordance with training package requirements:

Performance Assessment

The candidate will be required to demonstrate their practical skills integrated with their knowledge during practical assessment activities. These activities are sourced from varying equipment inspection, pre-operational site checks, and fault finding and reporting. Trainers will regularly challenge test candidates throughout the course on and mark their practical checklist accordingly.

Written Theory Assessment

The candidate will be required to satisfactorily complete the theory assessment comprising Section 1 Knowledge Assessment - 58 short answer & multiple-choice questions and Section 2 Calculations 8 questions. These will be marked on the spot in order to provide the candidate with immediate feedback and to allow them to identify areas for further development.
