

RIIHAN309F - Conduct Telescopic Materials Handler Operations

Introduction

MIWT Pty Ltd is a Registered Training Organisation (RTO 41232) with ASQA (Australian Skills Quality Authority). MIWT has on offer the unit of competency RIIHAN309F - Conduct Telescopic Materials Handler Operations as a standalone unit. This unit of competency is targeted to participants who are existing and potential employees of a broad cross section of the Australian industry, who are working in an operational role, at worksites including civil construction, drilling, extractive industries, and metalliferous mining.

This course does not cover the requirements for operating a slewing telehandler or for crane jib attachments with a lifting capacity over 3 tonnes. A High-Risk Work Licence class C2 or above is required for slewing telehandlers, or CN or above for crane jib attachments over 3 tonnes.

Course Description

Participants will be equipped with skills and knowledge to operate a Telehandler.

As a result of this program, participants will be able to:

- Conducting prestart and start-up checks prior to commencing operations
- Selecting equipment or attachments suitable for job requirements
- Assessing site and operating hazards
- Using load handling communication methods
- Attaching, securing, lifting, carrying, and placing materials to meet job requirements
- Operating techniques to suit different work conditions
- Safely Mobilising machine and equipment between worksites
- Cleaning up after operations

Units of Competency

The Telehandler course comprises 1 unit of competency.

Module	Unit of Competency
1	RIIHAN309F Conduct Telescopic Materials Handler Operations

National recognition

This unit of competence has been drawn from the nationally endorsed industry training package RII - Resources and Infrastructure Industry Training Package (Release 9.0). On successfully completing the training and assessment, a Statement of Attainment (SoA) for the unit RIIHAN309F - Conduct Telescopic Materials Handler Operations. The unit of competency is nationally recognised and provides individuals with a valuable qualification that can be applied throughout Australia.

Program outline

The course will be delivered using different modes of delivery involving classroom-based instruction and practical skills development sessions. Training will be coordinated from MIWT head office and delivered in a simulated work environment. Candidates will participate in facilitated learning sessions using PowerPoint presentations, handouts and discussion. During practical sessions, candidates will be asked to work in pairs and facilitated through a range of practical skills using various height safety equipment. Participants will learn skills through practical instruction using demonstrated performance methods such as: Demonstration, explanation.

Expected duration

The program is delivered over 8 - 16 hours dependent on your level of skills and knowledge, the course is comprised of theory and practical sessions. The program culminates with a practical assessment activity and theory assessment.

Assessment requirements

Candidates must successfully complete all assessment activities in order to be assessed as competent.

The assessment for Telehandler is to be conducted using a combination of written theoretical assessment and practical assessment during simulated workbased scenarios. The following assessment methods are to be applied to collect the required assessment evidence in accordance with training package requirements.

Performance Assessment

The candidate will be required to demonstrate their practical skills set integrated with their knowledge during practical assessment activities. These activities are sourced from varying equipment inspection, Pre-start, Operational Start-up Checks, Operate Shift Loads, Conclude operations shutdown secure site. Trainers will regularly challenge test candidates throughout the course on varying equipment and mark their practical checklist accordingly.

All candidates are required to take part in a practical scenario to complete the course. While this is a single-person activity it allows all participants to show competence to undertake the activity with a holistic approach understanding all the varying roles and responsibilities.

Written Theory Assessment

The candidate will be required to satisfactorily complete theory review assessment.

Entry requirements

There are age restrictions set by the Work Health and Safety legislation, all participants must be at least 18 years of age if requiring a National High Risk Work Licence, operating a slewing telehandler or for crane jib attachments with a lifting capacity over 3 tonnes. A High-Risk Work Licence class C2 or above is required for slewing telehandlers, or CN or above for crane jib attachments over 3 tonnes.

This course requires the participant to comprehend and complete MIWT's learning materials, i.e., MIWT's Risk Assessment/ Job Safety Analyses. and the oral/written knowledge assessment. This course requires the participant to comprehend and complete MIWT's learning materials, i.e., MIWT's Risk Assessment / and the oral / written knowledge assessment.

Language, literacy and numeracy requirements

Persons who undertake this program require sufficient literacy and numeracy skills to read, comprehend and complete MIWT's learning materials, i.e., MIWT's Safe Work Method Statement (SWMS), and the oral/written knowledge assessment.

Recognition of Prior Learning

Applicants can apply for recognition of their existing skills and knowledge that are relevant to the unit of competency. These skills and knowledge may have been obtained through workplace training or experience and may reduce the time required to complete the program. Candidates are encouraged to notify MIWT of their interest or intention to apply for RPL prior to their enrolment.

Candidate Information

Detailed Candidate information is available within our Participant Handbook which is supplied with the enrolment package. This booklet contains important information about a Candidate's rights and obligations such as their right to privacy, a safe training environment and the right to complain or appeal an assessment decision. It is important that persons applying for enrolment have had an opportunity to review this information first. Please contact us and we can send this information to you straight away.

Clothing Requirements

Clients must wear Hi Vis clothing and work boots for the practical component of the training.

Where a client does not wear work boots and work wear, they may not be able to participate in the practical component due to work health and safety concerns.

Our Guarantee to Candidates

MIWT is responsible for the quality of the training and assessment to be provided during your enrolment and for the issuance of any AQF certificates issued to you.

Fees and Charges

Information about fees and charges is provided in the Schedule of Fees and Charges which will have been included in your pre-enrolment information package.

Please refer to the Schedule of Fees and Charges as it contains important information about related charges and our refund policy.
