

Course Name:

aware365 - Restricted Electrical Work Licence – CPD - TAS

Course Cost:

\$350.00 per person

Key Information About This Course:

This learning pathway has been developed in consultation with Consumer, Building and Occupational Services (CBOS) as a professional development course and information refresher and is designed specifically for existing Restricted Electrical Work Licence (REWL) Holders and is approved as the entire Continuous Professional Development (CPD) activity required to be undertaken by the licence holder during the licence period.

The learning pathway is self-paced, typically it can take you up to 1 day to complete, you may stop at any time and come back to it starting automatically from where you left the learning path. The system automatically logs your activity and your completion progress, remembering where you are at on your return.

You must complete each step and chapter to progress to the next, download all the relevant resources, read them and then watch all the relevant accompanying videos in the pathway to progress to the next step and finally to the assessment.

This pathway covers information, learning and assessments outcomes for pre-existing licence holders only and is not part of the original licencing course that must be completed to conduct REWL work.

Each aware365 course has an appointed specialist trainer and assessor and general problem solver to make your training experience run as smoothly as possible. Access your nominated specialist is 9 am to 5 pm Monday to Friday during normal business days this excludes weekends and public holidays. If required, you may request an appointment out of normal hours by email.

About the Learning Pathway:

This pathway is structured into 10 chapters

1. Introduction and Acknowledgements
2. REWL Learner Guide and CBOS Requirements
 - a. Assessment
3. Workplace Safety and Risk Assessment

 - a. Assessment
10. Course Completion Details

Learning pathway outcomes:

Candidates must successfully complete all assessment activities to receive a statement of completion and be eligible for the CPD points allocated to this course by CBOS.

Continuous Professional Development Points (Tasmania):

Dual Licence Holders.

This course has been approved for 3 CPD points (where the restricted electrical is their secondary licence). These practitioners will be required to undertake this course once every three years as part of their overall CPD requirements.

Restricted Electrical Licence

For those who only hold the restricted electrical licence this refresher course will suffice for their full CPD requirement (36 points under the current CPD framework) – these practitioners' will also be required to undertake the course once every three years.

Assessment:

The candidate will be required to complete 3 assessment activities throughout the learning pathway.

Pre-requisites:

Anyone can complete this learning pathway, however, to earn CPD points as described above, the learner must hold a current **Dual Licence for 3 points** or a **Restricted Electrical Licence** for 36 points that has been issued by the Tasmanian government trade licence regulator CBOS www.cbos.tas.gov.au

The Restricted Electrical Licence classes included are:

Restricted Electrical Work Licence (REWL Practitioner) – Type 1

- Refrigeration and Air-conditioning
- Instrumentation and Control
- Electronics and Communications

Restricted Electrical Work Licence (REWL Practitioner) – Type 2

- Water Heaters
- Composite Equipment
- Control Devices
- Gas Appliances
- Motors
- Explosion Protection

Language, literacy and numeracy requirements:

Persons who take part in this learning pathway will require basic computer skills in combination with sufficient literacy and numeracy skills to read, comprehend and complete the online learning materials, by following basic instructions using a smartphone, tablet, laptop or PC.

**Device Requirements:**

We recommend completing this learning pathway on a Laptop, however, the course can be viewed from a smartphone, tablet, laptop or PC.
