## **PDA Corporate 4WD Program**

Performance Driving Australia delivers defensive driver training and four-wheel drive training programs, Australia wide. Our clients include many large corporations and government departments.

Our team of trainers are friendly, professional, and highly skilled to deliver programs.

Our training approach focuses on engagement and interaction rather than traditional 'classroom style' training.

I have included some information and pricing for your review. Please note that content and delivery can be modified to suit your specific requirements and the price may alter to reflect this.

## **Introducing Performance Driving Australia**

Performance Driving Australia design and deliver programs for employees who operate vehicles on and off road in a range of conditions as part of their job.

Programs are designed to be challenging and relevant to maximise the effectiveness.

Most programs combine theory and practical skill building which equips participants with safe vehicle practises.

### Theory

Our team of outstanding trainers have decades of experience and present the theory component of the program in an interactive and participant driven format which provides participants with a stronger sense of self accomplishment that reaches beyond the classroom and into their everyday lives.

We establish a connection between participants real life experiences and basic driving techniques and road rules and combine this with engaging shared experiences and stories, to ignite a sense of accomplishment and autonomy for each participant.

### Practical

Practical training is delivered in a safe and controlled environment that allows drivers to explore how they and their vehicle will handle a variety of terrain and situations.

Every driver that completes a **PDA Corporate 4WD Program** will be able to safely control the vehicle in a range of different environments.

A key principle in the delivery of our program is to relate key learning points to real-life examples through engaging participants in hands-on experiences.

Our goal is to provide drivers with the skills to protect their own lives and that of their passengers and avoid unnecessary incidents and crashes.

## Corporate 4WD Program

4WD program with a mixture of theory and practical presented all in one day.

### Theory session

The theory session is delivered in a format that encourages engagement from all participants.

A written assessment is completed during the theory session.

- Task Planning and Preparation
- Driver attitude and Behaviour
- Vehicle and 4WD systems
- Road and Site rules
- Risk Identification and Management
- Vehicle checks and safety
- Low Risk Driving Techniques
- Advanced Driving Techniques
- Common Causes of Motor Vehicle Crashes
- Terrain Negotiation
- Recovery equipment
- Tyre changing

### Outside activities

- Vehicle Inspection – Drivers are shown how to complete a vehicle inspection to check for serviceability and safety.
- Cabin setup (seating and steering)
- Identification of 4WD limitations (angles/clearance etc.)
- Optional- Tyre changing activity

### Practical session

- Practical exercises are designed to encourage safe driving both on and off road. If a suitable area is available this will include emergency braking on gravel roads.
- Practical components are flexible and are adjusted to meet drivers' experience levels and vehicle types and includes discussion on all modern safety and 4WD systems.
- Terrain negotiation over a variety of obstacles. Drivers will gain experience in operating in the different 4WD modes and understand how best to manage the 4WD off road.
- Programs include basic recovery/vehicle extraction. Please advise us prior to training the recovery equipment your drivers carry.

All training participants receive a certificate of completion electronically.

- *Optional Qualifications* - A statement of attainment (provided by RTO Competency and Compliance 41060) is available for the following units. There is an additional fee per driver to receive this certification.
- RIIVEH201E Operate Light Vehicle  
RIIVEH305F Operate and Maintain a Four-Wheel Drive Vehicle  
PMASUP236 Operate vehicles in the field

(SOA provided by RTO Global 4WD Training RTO40966)
