PDA Corporate Defensive Driving Program

Performance Driving Australia is a national provider of defensive driver training and four-wheel drive training programs. Our clients include many of the largest corporations and government departments in Australia.

Our team of trainers are friendly, professional, and highly skilled to deliver programs. Our training approach focuses on engagement and interaction rather than traditional 'classroom style' training.

I have included some information and pricing options to suit your requirement however please note that content and delivery can be modified to suit your specific requirements.

PDA Corporate Defensive Driving Program

Introduction

Performance Driving Australia design and deliver programs for employees who operate vehicles on and off road in a range of conditions as part of their job.

Programs are designed to be challenging and relevant to maximise the effectiveness.

Most programs combine theory and practical skill building which equips participants with safe vehicle practises.

Theory

Our team of outstanding trainers have decades of experience and present the theory component of the program in an interactive and participant driven format which provides participants with a stronger sense of self accomplishment that reaches beyond the classroom and into their everyday lives.

We establish a connection between participants real life experiences and basic driving techniques and road rules and combine this with engaging shared experiences and stories, to ignite a sense of accomplishment and autonomy for each participant.

Practical

Practical training is delivered in a safe and controlled environment that allows drivers to explore how they and their vehicle will handle a variety of terrain and situations.

Every driver that completes a PDA Driver training program will be able to safely control the vehicle in a range of different environments.

A key principle in the delivery of our program is to relate key learning points to real-life examples through engaging participants in hands-on experiences.

Our goal is to provide drivers with the skills to protect their own lives and that of their passengers and avoid unnecessary incidents and crashes.

PDA Corporate Defensive Driving Program

Defensive driving program including theory and practical components relating to driving in day to day environments.

Key Objectives

Provide drivers with the opportunity to learn the main causes of road crashes and how to apply defensive driving strategies to reduce the risks associated with operating a vehicle on public roads.

Allow drivers to safely experience the effect of speed on braking distances and the ability to avoid a hazard on the road.

Theory session

The theory session is delivered in a format that encourages engagement from all participants. A written assessment is completed during the theory session.

- Task Planning and Preparation
- Driver attitude and Behaviour
- Vehicle systems
- Road and Site rules
- Risk Identification and Management
- Vehicle checks and safety
- Low Risk Driving Techniques
- Advanced Driving Techniques
- Common Causes of Motor Vehicle Crashes
- Operational considerations
- Tyre changing

Outside activities

- Vehicle Inspection – Drivers are shown how to complete a vehicle inspection to check for serviceability and safety.
- Cabin setup (seating and steering)
- Optional - Tyre changing

Practical session

Practical exercises are designed to encourage safe driving by demonstrating the effect of speed when negotiating an emergency and the importance of correct car control techniques.

- Practical components are flexible and adjusted to meet drivers' experience levels and vehicle types. Training will familiarise drivers with ABS, ESC and active driving aids.
- Emergency braking in a straight line conducted at various speeds
- Collision avoidance at various speeds

All training participants receive a certificate of completion electronically.

- Statement of attainment for – **RIIVEH201E Operate Light Vehicle**
- (SOA provided by RTO Global 4WD 40966)

Venue

- Baskerville Raceway
- Symmons Plains Raceway
- Burnie Airport

Other venues may be available. Please call to discuss.
