

# RIIWH5202E Enter and Work in Confined Spaces

The Confined Space Entry training is designed for those who work in, on or around confined spaces. This course provides participants with the knowledge and practical skills to operate safely within these confines.

Participants will learn:

- How to identify WHS hazards, assess risks and apply the appropriate control measures.
- To identify the limitations of permits under which work is to be conducted.
- To understand the importance of the (stand-by) observer role when operating as a member of a confined space work team.
- To assess risk prior to commencing any task associated with confined spaces.
- To select, fit and wear appropriate Personal Protective Equipment (PPE) and monitor equipment necessary for the safe execution of the task.
- About the respective state or territory legislation relevant to confined spaces including the Work Health & Safety Act 2012, Confined Space Codes of Practice, Confined Space Codes of Compliance and the current AS 2865: 2009 Confined Spaces.
