

## • WPCG WORK CLEARANCE ISSUER REFRESHER

### • ABOUT THIS COURSE

This course has been developed to refresh your understanding of the WPCG Control of Work process.

### **COURSE OBJECTIVES**

After completing this course, you will be able to:

- Explain the WPCG Control of Work Process
- Identify what work can be performed using the Work Clearance & Minimum Controls Checklists
- Identify additional authorisations and when they are required
- Describe the legislative framework that governs your work & your duty of care
- Describe the characteristics of petroleum products and hazardous areas
- Use the hazard maps to identify hazardous areas
- Identify your role and responsibilities as a WPCG Work Clearance Issuer
- Explain the WPCG Work Permit Process

### **REQUIREMENTS**

To complete this course, you need to complete each topic and apply your understanding through short knowledge checks as you go.

Many of the questions refer to the forms and the activity matrix. Make sure you refer to them. You can find them in the forms menu.

You can also refer to the learners guide used in the training , that is also available in the forms menu. [LearnerGuide.pdf](#)

- This course will take approximately 2 ½ hours to complete.  
This course includes audio.
