

# SAFELY ACCESS THE RAIL CORRIDOR TRAINING

This nationally recognised course will provide participants with the knowledge, training and skills to effectively work safely in and around the rail corridor. The training will detail how to take appropriate safety precautions to access the danger zone, access the rail corridor and how to respond appropriately in an emergency. This course is for people who are going to be working in and around the rail corridor.

## Course Outline

The key areas covered by this course include:

- How to safely access and work in the rail corridor
- Recognising the danger zone
- How to identify and access a safe place
- Identifying the direction of approaching traffic
- Applying minimum sighting distances
- Maintaining situational awareness to identify potential risks
- Identifying and explaining the use of communication tools when working in the rail environment
- Identifying electrical safety hazards, risks and controls used in the rail corridor
- Identifying and reporting unsafe situations within the rail environment
- Undertaking work activities under local track protection rules in accordance with safe working rules, procedures and regulatory requirements

## Inclusions

- Our online course was built from the ground up by industry experts. It is designed to be easy to use, easy to understand and works on multiple devices and platforms.
- Our course is heavily audio-based and participants will learn directly from an industry expert, just as if they were in a classroom.

## Mandatory Requirements

Participants must:

- Have at least a Year 10 level of numeracy, literacy and communication skills
- Have the ability to read, hear and write English
- Have a sound level of computer skills to navigate through the e-Learning course
- Have access to audio functionality to listen to the course content

## Certification

Participants who are deemed competent will receive a Statement of Attainment recognised under the Australian Qualifications Framework. This certification is nationally recognised. The Statement is issued by Pinnacle Safety and Training (RTO 40496).

## Mode and Duration

- e-Learning up to 4 hours

## National Unit of Competency

TLIF0020 Safely access the rail corridor
