

Type B Gas Course TYBG – 2023

CPCPGS4023 Install, commission and service Type B gas appliances

This unit makes up part of CPC40920 Certificate IV in Plumbing and Services

Quick info: TYBG-2023 Online (7) Modules plus (5) days (F2F) Practical

Type B Gas Course

Organisation: Bizmatrix Pty Ltd

Location: Unit 67/193-203 Southpine Road, Brendale, QLD 4500

Phone: 1300 588 749

Email: info@bizmatrix.edu.au

Website: www.bizmatrix.edu.au

RTO No. 32074

Ver2 - 2023

Type B Gas Course in detail:

Course outline:

This unit is selected from CPC40920 Certificate IV in Plumbing and Service.

The unit to be completed is *CPCPGS4023 Install, commission and service Type B gas appliance*.

This unit covers the skills and knowledge required to install, commission and service Type B gas appliances, from the gas isolation valve and electrical isolation switch to the flue spigot on the appliance.

Who can do Type B Gas?

A person with a call of trade, mechanical fitter, electrical, gas fitter who is looking to learn about installing, commissioning, and servicing industrial gas appliances in the plumbing, gas, and electrical sector.

Pre-requisites:

- CPCPCM2043 Carry out WHS requirements **
- UEERL0004 Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring.

Note: The applicant must obtain the pre-requisites prior to commencing and completing the CPCPGS4023 course section.

- Licenced Electricians, Restricted Electrical Licenced with Disconnect-reconnect will be eligible for RPL or Credit Transfer to recognise the UEERL0004 unit.

OR:

- If you only require the Type B gas qualification and no Electrical qualifications, we offer a course to cover the pre-requisite UEERL0004 Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring.

OR:

- If you do not already have the above qualifications, we now offer Type B blended Restricted Electrical Licence training course, which can be embedded in the Type B gas training.

The participants will complete the Restricted Electrical Licence course units first including the practical, then continue to the Type B gas course, where the balance of the restricted electrical is completed. Hence why the courses are blended, the training is separate and are standalone courses.

**** included in the course fees**

What does the Type B gas course cover?

Type B gas course covers installing, commissioning, and servicing Type B- industrial gas appliances. Upon successful completion of the Type B Gas course and receiving a statement of attainment for Qualification evidence or you could be eligible to apply through the Queensland Gas Licencing unit/department for your Type B Gas work authorisation to work on Type B gas appliances, or a Type B gas Licence in other States.

Unit details:

This unit is a complex unit, so it is recommended that participants have some experience in combustion theories and practice for gas, complex control systems and some gas fitting knowledge. Attendees will gain valuable knowledge about correct and safe working procedures for Type B commercial/industrial gas appliances, gas and electrical servicing, general safety and risk control processes, commissioning, repairs, program service and maintenance from the basics, to correct servicing techniques of more complex equipment and, how to safety check and leak check equipment, plus many other benefits.

Assessment: Theory questions, portfolios, and practical exams on a wide range of equipment. All assessments follow Nationally Accredited training style.

Relevant areas covered:

- Gas-Electrical servicing, commissioning, and maintenance theory.
- Correct testing procedures and methodology.
- Electronic ignition/Flame rods and sensing systems training.
- The correct methods of leak tests and using the correct pressures.
- Electrical with gas training, control circuits and complex gas systems.

Australian Standards will be supplied and included in the course fees, free of charge.

Option 1: Type B Gas Course – (Have an Electrical Licence)

For those who already have an Electrical or Restricted Electrical Licence

Type B Gas Course: Start with (7) modules of Online eLearning first, Virtual Online Classes plus 5 days Face to Face (F2F) practical training.

Option 1:	Have an Electrical Licence	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	RPL \$ 250
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	
CPCPGS4023	Install, commission and service Type B gas appliances	\$ 4,600
CPCPCM2043	Carry out WHS requirements	
OPTION 1: Type B gas (Has an Electrical Licence) PRICE		\$ 4,850

Option 2: Type B Gas Course – (Type B Qualification only)

For those who only require the Type B gas Qualification with NO electrical licence

Option 2:	Type B gas Qualification – NO Electrical Licence required.	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	\$ 990
UEERL0003	Conduct in-service safety testing of electrical cord connected equipment and cord assemblies	
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	\$ 4,600
CPCPGS4023	Install, commission and service Type B gas appliances	
CPCPCM2043	Carry out WHS requirements	\$ 5,590
OPTION 2: Type B gas (NO Electrical Licence) PRICE		

Option 3: Type B Gas Course – (Blended with Restricted Electrical)

For those who require a Restricted Electrical Licence for the Type B gas work.

Option 3:	Type B gas Qualification – Blended Restricted Electrical Licence	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	\$ 1,995
UEERL0003	Conduct in-service safety testing of electrical cord connected equipment and cord assemblies	
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	
UEERL0005	Locate and rectify faults in low voltage (LV) electrical equipment using set procedures	
UEERL0001	Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply	
CPCPGS4023	Install, commission and service Type B gas appliances	\$ 4,600
CPCPCM2043	Carry out WHS requirements	
OPTION 3: Type B gas (With Restricted Electrical Licence) PRICE		\$ 6,595

Option 1: Type B Gas Course – (Have an Electrical Licence)

For those who already have an Electrical or Restricted Electrical Licence

Type B Gas Course: Start with (7) modules of Online eLearning first, Virtual Online Classes plus 5 days Face to Face (F2F) practical training.

Nationally recognised unit:

- CPCPGS4023 Install, commission and service Type B gas appliances

Pre-requisites – Recognition of Prior Learning (RPL) for:

- CPCPCM2043 Carry out WHS requirements
- UEERL0004 Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring.

TRAINING TIMETABLE

Type B Gas Course:

- Online (7) Modules and (8) Online Virtual Classes (Theory & learning & assessments).
- Face to Face (5) days to complete practical and practical assessments.

Time frame:

- First step on signs on – provide **JP certified** evidence of an Electrical Licence
- Recognition of Prior Learning (RPL) of UEERL0004 and UEECD0007
 - Complete the online eLearning (7) Modules (pre-requisite) approximately 60 - 80hrs over 3-4months, plus
 - Attend online 8 x 1-2hrs virtual classes.

(Must be completed by due dates & prior to face to face (F2F) practical training.)
- Second step attend 5 days practical/assessment training at Bizmatrix training centre
 - Time: 7:30am – 4:30pm. (See dates on website.)

Option 1:	Have an Electrical Licence	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	RPL \$ 250
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	
CPCPGS4023	Install, commission and service Type B gas appliances	\$ 4,600
CPCPCM2043	Carry out WHS requirements	
OPTION 1: Type B gas (Has an Electrical Licence) PRICE		\$ 4,850

Option 2: Type B Gas Course – (Type B Qualification only)

For those who only require the Type B gas Qualification with no electrical licence

- Commence with the Disconnect-reconnect UEERL0004 course for the accredited unit

Type B Gas Course: Start with (7) modules of Online eLearning first, Virtual Online Classes plus 5 days Face to Face (F2F) practical training.

Nationally recognised unit:

- CPCPGS4023 Install, commission and service Type B gas appliances

Pre-requisites – Recognition of Prior Learning (RPL) for:

- CPCPCM2043 Carry out WHS requirements
- UEERL0004 Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring.

TRAINING TIMETABLE

Disconnect-reconnect course:

- Online (2) Modules- Electrical/WHS (Theory & learning & assessments)
- Face to Face (3) days to complete:
 - WHS, Test and Tag & Disconnect-reconnect practical and practical assessments.

Note: The outcome is for a Statement of Attainment only – Not a Disconnect-reconnect Licence

Type B gas course:

- Online (7) Modules and (8) Online Virtual Classes (Theory & learning & assessments)
- Face to Face (5) days to complete practical and practical assessments.

Time frame:

- First step on signs on – register for Disconnect-reconnect
 - Complete the Disconnect-reconnect unit training online (2) modules and (3) days face to face practical first, then
 - Complete the online eLearning (7) Modules (pre-requisite) approximately 60 - 80hrs over 3-4months, plus
 - Attend online 8 x 1-2hrs virtual classes.

(Must be completed by due dates & prior to face to face (F2F) practical training.)

- Second step attend 5 days practical/assessment training at Bizmatrix training centre.
 - Time: 7:30am – 4:30pm. (See dates on website.)

Option 2:	Type B gas Qualification – NO Electrical Licence required.	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	\$ 990
UEERL0003	Conduct in-service safety testing of electrical cord connected equipment and cord assemblies	
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	
CPCPGS4023	Install, commission and service Type B gas appliances	\$ 4,600
CPCPCM2043	Carry out WHS requirements	
OPTION 2: Type B gas (NO Electrical Licence) PRICE		\$ 5,590

Option 3: Type B Gas Course – (Blended with Restricted Electrical)

For those who require a Restricted Electrical Licence for the Type B gas work.

- Commence with the Restricted Electrical Course – Online (2) Modules plus (5) Days Face to Face (F2F) practical and assessments, then
- Type B Gas Course: Start with (7) modules of Online eLearning first, Virtual online Classes plus 5 days Face to Face (F2F) practical training.

Nationally recognised unit:

- CPCPGS4023 Install, commission and service Type B gas appliance

Pre-requisites – Recognition of Prior Learning (RPL) for:

- CPCPCM2043 Carry out WHS requirements
- UEERL0004 Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring.

TRAINING TIMETABLE

Restricted Electrical Type B Blended course:

- Online (2) Modules- Electrical /WHS (Theory & learning & assessments)
- Face to Face (5) days to complete:
 - WHS, Test and Tag, Disconnect-reconnect, Locate and Rectify, plus Plugs and Cords 250VAC.

Note: The outcome is for a Restricted Electrical for the Disconnect- reconnect, locate and rectify faults, Plugs and cords to 250 VAC only (No log book required) QLD licence and training is blended with the Type B gas course.

Type B gas course:

- Online (7) Modules and (8) Online Virtual Classes (Theory & learning & assessments)
- Face to Face (5) days to complete practical and practical assessments

Time frame:

- First step on signs on – register for Disconnect-reconnect/blended
 - Complete the Restricted Electrical units training online (2) modules and (5) days face to face practical first, then
 - Complete the online eLearning (7) Modules (pre-requisite) approximately 60hrs over 3-4months, plus
 - Attend online 8 x 1-2hrs virtual classes.

(Must be completed by due dates & prior to face to face (F2F) practical training.)
- Second step attend 5 days practical/assessment training at Bizmatrix training centre.
 - Time: 7:30am – 4:30pm. (See dates on website.)

Option 3: Type B Gas Course – (Blended with Restricted Electrical)

For those who require a Restricted Electrical Licence for the Type B gas work.

Option 3:	Type B gas Qualification – Blended Restricted Electrical Licence	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	\$ 1,995
UEERL0003	Conduct in-service safety testing of electrical cord connected equipment and cord assemblies	
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	
UEERL0005	Locate and rectify faults in low voltage (LV) electrical equipment using set procedures	
UEERL0001	Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply	
CPCPGS4023	Install, commission and service Type B gas appliances	\$ 4,600
CPCPCM2043	Carry out WHS requirements	
	OPTION 3: Type B gas (With Restricted Electrical Licence) PRICE	\$ 6,595

Restricted Electrical Licence Course: (Blended Skills Set)

Details:

Skill Sets	<p>Trade of calling:</p> <p>Type B Gas Record of Results/Gas fitter and/or Plumber, the Restricted Electrical Training in conjunction with training in Type B or other gas courses. (NOT REQUIRED – ELECTRICAL PERMIT or LOGBOOKS)</p>
Program Name	Skill Set Service and Repair Disconnect-reconnect 2, Plugs and Cords, Low Voltage Fixed Wire Electrical Equipment up to 230Vac (Gas Fitting Equipment) Plumbing/Gas – Gas Fitters Licence.
Mandatory units common to all units	UEECD0007 Apply work health and safety regulations, codes and practices in the workplace.
Units for skill set	<p>UEERL0004 Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring.</p> <p>UEERL0005 Locate and rectify faults in low voltage (LV) electrical equipment using set procedures.</p>
Included in our training	UEERL0003 Conduct in-service safety testing of electrical cord connected equipment and cord assemblies.
Course detail	<p>Restricted electrical units. Online eLearning, virtual classes, and then 5 days face to face practical training.</p> <p>Embedded in the Type B gas training course or in conjunction with a Type B qualification:</p> <ul style="list-style-type: none"> • No Electrical Permit Required • No Log Book • Must be completed with a Type B Gas course in conjunction • Please notify us if you have a base trade or calling. • All the relevant Australian standards included in the fees. • If you have another call of trade, then you can add on the additional appliances or equipment relevant to your call of trade eg: Plumbers – Hot Water units 230Vac at no additional costs or training. <p style="text-align: right;">Selection Type B Restricted Electrical \$ 1,995</p>

Before you book a course:

- Understand the online eLearning, assessment commences on enrolment, and the work must be completed by each due date & prior to the face to face (F2F) practical training.
- It is a pre-requisite to complete the (7) Modules online by the due dates, prior to the (F2F) practical training.
- Plan your study periods and attendance to the regular virtual online classes.
- Allow at least 8-12 weeks to complete the online learning, and assessments.
- The online work must be completed over a period of time to comply with the volume of learning and to assist with a better learning experience.
- Check the due dates for the online eLearning and the assessments.

The advantages of the online eLearning and Virtual classes:

- The online eLearning modules are designed with additional support – with how to videos and virtual practical video sessions, showing the workings of the Type B gas appliances.
- Flexibility – complete the online work at your pace and to suit your personal life.
- The face to face now only (5) days. Less time away from work.
- More time to learn and to absorb the learning experience.
- Able to replay the how to videos or review the learnings.
- The learnings and support available online – Access to trainers.

What is included in the Bizmatrix Type B Gas Course?**Bizmatrix will provide**

- Student manuals, training plan and assessments.
- A textbook will be provided for Gas (Basic Plumbing Service Skills).
- Access to the relevant Australian standards.
- Training aids and real-life Type B gas simulators – Type B Gas appliances.
- Small classes between 6 – 10.
- Quality, qualified and current experienced educators.
- All standards supplied free of charge (over \$1,000 worth)
 - PDF copies and able to print.
 - No expiry date.
 - The latest edition of the standards.

Students must provide for the (F2F) sessions.

- The correct PPE for the practical work – *Please Note: you will not be allowed to attend without these items.*
 - Safety boots and eye protection glasses
 - Long sleeve /long pants (Cotton) flame proof workwear clothing.
- Pens, pencils, rulers, calculators.
- Laptop computer or notebook tablet for training onsite.

After you are deemed competent, what is next?

This course is a pathway to developing comprehensive skills and knowledge of the Type B industrial/commercial gas appliances in the Gas Industry and will help you to further your career.

Finally, once the course has been completed and it has been confirmed that you have an electrical licence, you will then receive an official Statement of Attainment by Bizmatrix. This allows you to apply for the relevant licensing/GWA (if applicable) or just demonstrate competency to enable you to work under and Safety management Plan, or a Gas Work Authorised /Type B gas authorised/licensed company/person.

Upon completion of the Type B Gas Course, provided you are competent you will be able to work on the following:

Commercial/Industrial Type B gas appliance training:

- Obtaining authority or a Type B gas licence to undertake work on Type B appliances-submissions.
- Have the competence to demonstrate and to work on Type B gas appliances under a safety Management plan or a Gas Work Authorisation.
- Prepare for work-Safety, Gas components, Component specifications, tools and equipment.
- How to install Type B gas appliances.
- Commissioning and test Type B gas appliances.
- Install and Service Type B gas appliances.

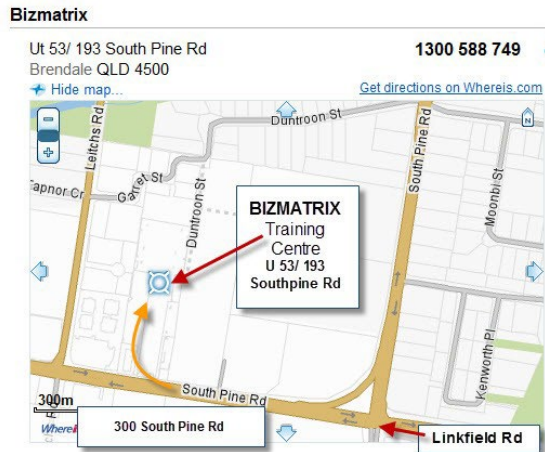

Successful participants will receive:

- A record of results pending evidence of the electrical license or permit.
- A Statement of Attainment in recognition with and conforming to the AQTF requirements
- Access to technical support & information.
- Confidence in their ability to install, commission, service, repair and maintain commercial/Industrial Type B gas appliances.
- Greater knowledge of Type B gas appliances and equipment.
- Personalised tuition – class sizes restricted to maximum 10 people
- Access to further training & information about the gas industry by becoming a member of the BIZMATRIX database

Note: Persons need to obtain an Electrical Licence within 9 months after completing the course.

Where are we?

Unit 67/193-203 South Pine Road- BRENDALÉ QLD 4500

Bizmatrix training centre can be located at the back right hand corner of Brendale Business Park. Upon entering from South Pine Road, you will have the Boiler Room Café on your left-hand side, drive to the BACK of the building – to unit 32 – turn RIGHT and drive to the end following it around to the LEFT – ahead you will see Absolute Plumbing – pass them and we are in the units next them.

Frequently Asked Questions:

What's Included in the Type B gas Fees?

The following standards are included free of charge, on sign up AS3814, AS1375 AS5601.1, AS1596, AS3000 and AS2593 Approximate value more than \$1,600.

Included the pre-requisite unit-CPCPGS2043 Carry out WHS requirements

Training resources and simulator rigs, supportive online text books, learner manuals and videos / learner materials.

Why is it an authorisation not a licence?

Applications to be a Type B gas authorisation can be made at:

<https://www.business.qld.gov.au/industry/building-construction/gas/type-b> a Gas Work Authorisation in Queensland Type B will be authorised to approve up to three classes of gas devices based on gas usage capacity and complexity. These classes and the process for assessing and approving authorities are outlined in the <https://www.business.qld.gov.au/industry/building-construction/gas/type-b>

To undertake work on any Type B gas device a Gas Work Authorisation is needed. A Type B gas device is any gas device that is not a Type A (badged appliance) gas device. This includes industrial gas plants and many commercial gas devices, or a fuel gas system for a vehicle or vessel. There are four classes of Gas Work Authorisations in Queensland.

Reference: Department of Natural Resources and Mines.

Why do you need to have a restricted electrical licence to apply for Type B authorisation?

Bizmatrix now offer a Type B-REL blended option which means you do not need the licence, as the application is made after training.

Additionally, all existing restricted electrical licence holders, on the completion of the Type B gas qualification, must make application for an Individual GWA in their own name, then make application with the ESO with the evidence of the GWA to have their existing REL endorsed for all electrical work covered under an individual Type B gas authorisation.

Is the Type B Gas Course difficult?

Unlike other gas courses in the industry, the Type B Gas course is overly complex and content rich course, but don't let that get you down. Bizmatrix guide you through appropriately, and upon completion you will feel a great sense of satisfaction for your expanded knowledge and abilities in gas and electrical work. This course opens many opportunities for you as a student and as a prospective gas worker to network and get ahead of those in the gas industry.

Can one person on site hold their Type B Authorisation, and let the rest of the employees work 'under' that?

No, any person working on a Type B Appliance must hold their authorisation; they cannot simply work with someone who has it. See Queensland Natural Resources and Mines for more information <https://www.business.qld.gov.au/industry/building-construction/gas/type-b>

What happens if I don't have my electrical licence and still want to do Type B?

You will receive a Record of Results; however, you will be unable to apply for your Type B authorisation. This situation usually occurs in organisational managers or training coordinators who want to understand Type B and what their staff are learning about whilst working on-site but are not going to be practicing it or working in it.

Does my company need to have a company gas licence for "Type B Authorised Employees" to work on site? Or will just the employees who hold a "Type B Authorisation" cover that?

The qualification is an individual authorisation but is set under the prime company Gas Work Authorisation so they can go any site, so it is not site specific.

However, your company must hold company GWA authorisation with individuals, only employees listed as authorised and under company name. Applying for the company authorisation is complete when your employee is applying for his Type B Authorisation, so he will be able to do the work, but will be under your companies' name.

Once your organisation has put the first person through Type B Gas Course then they can then apply for their authorisation (GWA) then add more on from there with each applicant.

Is your company considered as an operating plant?

If yes, then the fitters without electrical licences, may complete the training without the restricted electrical and be issued with a record of results and then be listed under your companies Gas Authorization as competent to work on Type B gas systems.

Alternatively, if they need the gas authorisation, they will be required to complete a Restricted Electrical Course, then on completion of both the REL and Type B gas training, we can then issue the Certificate Statement of Attainment for CPCPGS4023 Install, service and commission Type B gas appliances.

I want to work on stationary gas fueled reciprocating engines.

The CPCPGS4023 course generically covers Type B gas appliances, including some theories for stationary engines. Under a gas work authorisation (motor fuel), stationary engines are restricted to a maximum capacity of 5 GJ/hour.

These are specific units covered for applicants seeking to work only on stationary gas fueled reciprocating engines

Evidence of the following specific stationary engine competencies must be provided with the application.

- UEPMNT367 Install and commission stationary gas fueled reciprocating engines
- UEPMNT368 Repair and maintain stationary gas fueled reciprocating engines

It is highly recommended for Gas work on stationary engines with a capacity greater than 5 GJ/hour the must be undertaken under a Gas Work Authorisation (Industrial Appliances).

Therefore, the applicant/GWA holder must complete CPCPGS4023 Install, service and commission Type B gas appliances

Frequently Asked Questions: No Call of Trade for REL

The following is the correct process for any applicant seeking a Gas Work Authorisation for Type B gas appliances where the applicant does not have a “call of trade” and where the applicant is required to complete incidental electrical work on Type B gas appliances and who currently holds an REL endorsed with other items.

To be issued with a statement of attainment for CPCPGS4023 Install, service and commission Type B gas appliances, the person is required to provide evidence of an electrical licence or equivalent for disconnect and reconnect.

This process enables a person without a call of trade the ability to achieve the full outcome of a GWA and REL for a Type B gas appliance qualification.

Definitions

- (LAU) Licence and Authorisation Unit NRM Natural Resources & Mines.
- (ESO) Electrical Safety Office Licencing unit.

The following process has been agreed as an acceptable process by which an applicant can achieve the required ‘licenses’ to undertake Type B gas work in Queensland.

1. Applicant must complete CPCPGS4023 at a Registered Training Organisation (RTO). All gas units must be satisfactorily completed, and the electrical units are at the agreement of the applicant and Bizmatrix.
2. Bizmatrix issues a ‘Record of Results’ for the gas units, disclaimer for no Restricted Electrical Work Licence.
3. Applicant presents ‘Record of Results’ to LAU as part of the application for a GWA in his name.
4. LAU issues Gas Work Authorisation – Industrial Appliances (GWA) in the applicant’s name.
5. This will be conditioned to evidence of ‘Certificate of Attainment’ being provided within one month of GWA being issued.
6. Applicant presents GWA and supporting documentation (Form 21) to the Electrical Safety Office when applying for a REL.
7. Applicant provides copy of the 7-day permit to Bizmatrix.
8. Bizmatrix completes documentation and issues ‘Certificate of Attainment’ for CPCPGS4023.
9. Applicant provides ‘Certificate of Attainment’ to the LAU for records.
10. Applicant then provides a certified copy of the GWA to the Electrical Safety Office – When the applicant has completed the REL subjects with Bizmatrix- Bizmatrix will issue the Statement of attainment for the REL units and the SRTO form 39 to the Electrical Safety Unit.

At this stage, the applicant will receive an REL with the endorsement restricted electrical work for 250V Type B gas work under the individual gas authorisation.

The ESO licensing office have confirmed a GWA (issued to an individual not a company) is considered to be evidence of a ‘trade or calling’, you will need to provide a letter or ‘statutory -declaration’ detailing the requirement for the applicant to perform incidental electrical work in relation to their primary trade (the GWA) and fulfil any other eligibility requirements.

Eligibility requirements for an REL can be found at: <https://www.worksafe.qld.gov.au/licensing-and-registrations/electrical-licences/electrical-worker-licences/restricted-electrical-licence-system-information-guide/eligibility-for-a-restricted-electrical-licence>

To register for the training course please select the relevant training OPTION and then complete the registration form.

Do you hold a qualification/licence in electrical?

YES (*Please provide a JP certified copy*)

NO (*Please proceed to OPTION 2 OR OPTION 3*)

Option 1: Type B Gas Course – (Have an Electrical Licence)

For those who already have an Electrical or Restricted Electrical Licence

Option 1:	Have an Electrical Licence	PRICING GST Free
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace	RPL \$ 250
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring	
CPCPGS4023	Install, commission and service Type B gas appliances	\$ 4,600
CPCPCM2043	Carry out WHS requirements	
OPTION 1: Type B gas (Has an Electrical Licence) PRICE		\$ 4,850

Course Selection Preferred Course	Standard Fees		Select
	<i>Full Payment within 7 days of Invoice.</i>
