

CERTIFICATE III IN AIR CONDITIONING AND REFRIGERATION

Get qualified in installing, commissioning, testing, fault finding, and repairing refrigeration and air conditioning conditioning systems.

Outcome and Qualification

On successful completion of the course you will be issued with the qualification **UEE32220 - Certificate III in Air conditioning and refrigeration**. This is an approved qualification which will enable you to apply for the RAC01 Refrigerant Handling Licence with the Australian Refrigeration Council. Students who do not complete the course in full will be issued with a statement of attainment for the competencies achieved.

Who should enrol in this course?

This course is being offered to qualified electricians who have already completed their Certificate II in Split Air Conditioning and Heat Pump Systems and wish to expand their knowledge and skills to undertake a broader scope of work in the refrigeration and air conditioning industry.

Course Duration

This qualification will take approximately 12-24 months to complete for those meeting the pre-requisite requirements. This course consists of practical workshops, workplace training and the completion of online theory assessment. Call our office on 1300 856 832 or check our website www.getskilledtraining.com.au for further information.

COURSE COST: From \$11,950 (NO GST)
